Outline, Aim and scope

Big data and smart computing are emerging research fields that have recently drawn much attention from computer science and information technology as well as from social sciences and other disciplines.

The goal of the International Conference on Big Data and Cloud Computing, initiated by VIT, Vellore is to provide an international forum for exchanging ideas and information on current studies, challenges, research results, system developments, and practical experiences in these emerging fields.

Topic Areas

The topics of interest for the conference include (but are not limited to) the following:

- Techniques, models and algorithms for big data
- Machine learning and AI for big data
- Web search and information retrieval
- Models and tools for smart computing
- Cloud and grid computing for big data
- Security and privacy for big data
- Smart devices and hardware
- Big data applications: Bioinformatics, Multimedia, Smartphones, etc.
- Tools and systems for big data
- Data mining, graph mining and data science
- Infrastructure and platform for smart computing
- Big data analytics and social media
- Hardware/software infrastructure for big data
- Mobile communications and networks
- Smart location-based services

Paper Submission Process:

Please submit your paper (in word/pdf format) **with 'Big Data and Cloud Computing'** mentioned in the subject line.

Full paper submission by: 30th April 2018

Notification of acceptance: 30th May 2018
